### Description

Hot on the heels of [Laughing on the Breeze](#), Like a Million Eyeballs is full of songs that your children will love to sing at the tops of their voices - particularly the title track for the older children which has some great electric & bass guitar. Little ones might love what our wee person calls the Brontosaurus song (correctly titled 'Line of Horus' - but including a Brontosaurus nonetheless), as well as the Tentomushi (Japanese for ladybird). For the grownups, there is 'Related to a Square' which might be familiar to those with children going through a maths phase. All in all, another smashing album that will inform, entertain and delight anyone who hears it.
